

# St. Mary's Hospital Madison, Wis.

## Long-Term Relationship Continues With Operating Room and Facility Expansion

- Hooper Corporation was contracted to assist St. Mary's Hospital in ongoing operating room and facility expansion.
- Hooper Plumbing first upgraded plumbing systems in the existing powerhouse located across the street from St. Mary's Hospital on South Mills Street.
- Plumbing was then extended through a tunnel underground to the existing building. This piping was routed through occupied spaces across the existing facility and located for use by the upcoming in-patient, out-patient and parking ramp facilities.
- Process Piping and Fire Protection installed services in the powerhouse and to the expanded facilities.
- Crews worked long hours, including nights and weekends, to complete the plumbing and medical gas installations into the new hospital facility.
- Crews completed work within occupied spaces with zero incidents.
- Hooper has remained the contractor of choice of St. Mary's Hospital since the 1990s.

Plumbing was extended underground from the powerhouse to the facility.

Plumbers worked nights and weekends to complete the upgrade to St. Mary's Hospital.

St. Mary's Hospital's new out-patient facility, parking ramp, and in-patient facility off of Erin Street in Madison, Wisconsin.
