

LS Power — Whitewater, Wisconsin

The Cogeneration Facility is located in the rolling countryside a few miles from Whitewater, Wisconsin. Hooper Corporation was contracted to fabricate and install piping including pipe with thicknesses up to 1-3/4". The tight schedule and the limited supply of local steamfitters made the combination of our own fabrication shop and our field installation forces a key combination to the success of this project.

Materials:

- Carbon Steel, Stainless Steel, Chrome Moly and Alloy 20 pipe materials
- Pipe sizes 1/4" to 54"
- Pipe wall thicknesses up to 1-3/4"
- 30,000 feet of pipe
- Duration: 12 months
- Personnel: 40 Steamfitters
