

# Project Profile

## Rhodia, Inc. Madison, Wisconsin

Rhodia, Inc. is a manufacturer of natural food additives such as natural food colors. When Rhodia had to relocate one of their facilities, they called on Hooper Corporation to provide all of their mechanical needs. Through a design build effort with The Renschler Co., Hooper provided Process Piping, Fabricated tanks, Plumbing, Fire Protection, and HVAC through our subsidiary company General Heating and Air Conditioning. The main obstacle in this project was to relocate their operations, including installing new un-tested equipment and procedures, with minimal production down times. All process piping is food grade 304L Stainless Steel tubing, and all piping and equipment able to withstand daily wash down of the area.

**Owner**.....Rhodia, Inc.  
Subsidiary of Rhone-  
Poulenc, Inc.  
Madison, Wisconsin

**Engineer** .....Strand Associates  
Madison, WI

**Contractor**.....The Renschler Co.
