

Project Profile

Underground Fastpath Services Greater Milwaukee Area, WI

Currently, Hooper Corporation has a three-year contract with WE Energies in southeastern Wisconsin.

In the three regions of southeastern Wisconsin, dedicated fastpath crews provide electrical service to new housing. After procuring a Digger's Hotline ticket to cover the work to be performed, crews provide the complete installation, testing, and energizing of secondary voltage to the house -- including the customer's meter. At the same time, crews install telephone and CATV drops as required.

All fastpath orders are non-engineered orders and must be completed within a 17-day window.
